

SANTOSH BHANDARI

Python Backend Developer

santoshvandari100@gmail.com | +977 9824988945

GitHub: github.com/santoshvandari | LinkedIn: linkedin.com/in/santoshvandari

Python Developer with 2+ years of experience designing and developing scalable RESTful APIs, backend services, and web applications. Strong experience with **Python, FastAPI, Django, Django REST Framework, PostgreSQL, and Docker**. Experienced in authentication and authorization, API security, database optimization, Redis, MongoDB, Qdrant, Next.js, Prisma, object/bucket storage, and deployments. Focused on building maintainable, secure, reliable, and high-performance applications.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript

Backend & Frameworks: FastAPI, Django, Django REST Framework, Flask

Frontend: React.js, Next.js, HTML, CSS

Databases: PostgreSQL, MySQL, MongoDB

Caching & Vector Databases: Redis, Qdrant

Authentication & Security: Authentication and Authorization, Role-Based Access Control, Permissions, API Security

API Development: RESTful APIs, API Documentation, Request Validation, Middleware, Logging, Error Handling

Cloud, DevOps & Infrastructure: Object/Bucket Storage, Docker, Docker Compose, Nginx, Linux, VPS

Testing: Pytest, Unit Testing & API Testing

Version Control: Git, GitHub

PROFESSIONAL EXPERIENCE

Associate Developer

Darse Technologies Pvt. Ltd. | January 2025 – Present

- Design, develop, and maintain scalable backend services using Python and FastAPI.
- Build secure RESTful APIs with authentication, authorization, and permission-based access control.
- Implement modular and reusable backend architectures to improve maintainability and scalability.
- Optimize database queries and backend processes to improve application performance and reduce response latency.
- Develop and maintain containerized multi-service environments using Docker and Docker Compose.
- Implement structured logging, request validation, and error-handling strategies to improve system reliability.
- Write unit tests and API test cases using Pytest to ensure application quality and stability.
- Collaborate with frontend developers, QA engineers, and product teams to deliver production-ready features.
- Participate in code reviews and contribute to engineering best practices, coding standards, and maintainable codebases.

Contract Developer (Part-Time))

Connectifi Solution Pvt. Ltd. | May 2026 – August 2026

- Migrated an existing website from PHP to Next.js, modernizing the application architecture and improving maintainability.
- Developed reusable and modular components using Next.js while preserving existing business functionality.
- Integrated Google Authentication for secure user sign-in and authentication flows.
- Implemented object/bucket storage for scalable file and object management.
- Optimized Prisma queries and database operations to improve application performance and reduce unnecessary database overhead.
- Integrated frontend functionality with existing APIs and backend services.
- Identified and resolved compatibility, migration, and performance issues throughout the application modernization process.
- Maintain and update existing websites, implementing new features, fixes, and performance improvements.

EDUCATION

Master of Computer Application (MCA)

Purbanchal University | Present

Gomendra Multiple Campus

Bachelor of Computer Application (BCA)

Tribhuvan University | 2025

Mechi Multiple Campus

AREAS OF INTEREST

- Backend Architecture & Distributed Systems
- Database Performance Optimization
- AI Agents & LLM Applications
- Cloud Infrastructure & DevOps
